

automated to

Concept

Design installation and management of fully electronically controlled automated public convenience facilities. Through partnering arrangements developing anti-vandal solutions, facilities that are hygienic, DDA compliant, conducive to facilities management and environmentally friendly.

Transforming existing obsolete public toilet stock into vibrant usable facilities that satisfy the needs of "away from home users".

Design

We offer a one stop shop with single point responsibility. Our design team, consisting of only chartered practitioners, enables us to offer a full design service and the expertise to fully develop initial concept ideas, client briefs etc, ultimately leading to the completed building.
